Appendix F: Final Exam Preparation Checklist

Work through this checklist in the last two weeks before your examination. Tick a skill only when you can do it accurately without looking at notes or examples.

Foundations

Skill	✓
Apply the order of operations, including fraction bars and absolute value	☐
Classify real numbers and order them on a number line	☐
Name and use the properties of real numbers	☐
Combine like terms and distribute, including negative factors	☐
Solve multi-step equations, including fractions, decimals, and variables on both sides	☐
Recognize equations with no solution or infinitely many solutions	☐
Rearrange formulas to solve for a given variable	☐

Inequalities, Functions, and Linear Relationships

Skill	✓
Solve and graph inequalities, reversing the sign when needed	☐
Solve compound and absolute value inequalities	☐
Decide whether a relation is a function; find domain and range	☐
Evaluate functions and solve f(x) = k	☐
Find slope from two points, a graph, or an equation	☐
Write linear equations in slope-intercept, point-slope, and standard form	☐
Graph lines using slope and intercepts	☐
Write and interpret linear models in context	☐

Systems

Skill	✓
Solve systems by graphing, substitution, and elimination	☐
Identify systems with one, no, or infinitely many solutions	☐
Write and solve systems from word problems	☐
Graph systems of inequalities and identify feasible regions	☐

Exponents, Exponential Functions, and Sequences

Skill	✓
Simplify expressions using all exponent rules	☐
Convert and compute with scientific notation	☐
Distinguish linear and exponential relationships	☐
Write and use growth and decay models	☐
Write explicit and recursive rules for sequences	☐

Polynomials and Quadratics

Skill	✓
Add, subtract, and multiply polynomials	☐
Factor GCFs, trinomials, perfect squares, and differences of squares	☐
Find the vertex, axis, and intercepts of a parabola	☐
Graph quadratic functions in standard and vertex form	☐
Solve quadratics by factoring, square roots, completing the square, and the formula	☐
Use the discriminant to predict the number of solutions	☐
Solve and interpret maximum, minimum, and projectile problems	☐

Statistics

Skill	✓
Calculate mean, median, mode, range, and IQR	☐
Read dot plots, histograms, and box plots	☐
Describe correlation and write a line of best fit	☐
Make predictions and explain their limitations	☐

The Day Before and the Day of the Examination

- Review Appendix C and the chapter reviews rather than learning new material.
- Prepare your materials: pencils, eraser, ruler, and an approved calculator with fresh batteries.
- Sleep well; a rested mind makes fewer careless errors.
- During the examination, read each question fully, show your working, and check your answers if time remains.
