Bonus 2: Study Plans

Choose the plan that matches the time before your examination. Each day is designed for about 45 to 60 minutes of focused work. If you fall behind, skip a "review" day rather than a "learn" day, and keep the practice tests in their places: they show you whether your study is working.

How to Use a Study Day

1. Spend five minutes reviewing yesterday's mistakes from your mistake log (Appendix E).
2. Read the chapter sections listed, working through each example on paper before reading its solution.
3. Complete the practice set or assessment listed, and mark it with Appendix A.
4. Study the worked solutions in Appendix B for every question you missed, and record the error in your log.

Four-Week Plan

Day	Focus	Tasks
1	Starting point	Diagnostic test (front matter); mark it and read the scoring guide.
2	Chapters 1–2	Chapter 1 practice and assessment; Chapter 2 practice.
3	Chapters 2–3	Chapter 2 assessment; Chapter 3 practice and assessment.
4	Chapter 4	Linear equations: practice exercises and assessment.
5	Chapter 5	Inequalities: practice exercises and assessment.
6	Review	Redo every missed question from Days 1–5; Bonus 4, types 1–4.
7	Practice Test 1	Timed (60 minutes); mark it and use the review map in Bonus 3.
8	Chapter 6	Functions: practice and assessment.
9	Chapter 7	Graphing lines: graphing practice and assessment.
10	Chapter 8	Linear models: practice and assessment.
11	Chapter 9	Systems of equations: practice and assessment.
12	Chapter 10	Systems of inequalities: practice and assessment.
13	Review	Missed questions from Days 8–12; Bonus 4, types 5, 6, and 10.
14	Practice Test 2	Timed (75 minutes); mark it and use the review map.

Day	Focus	Tasks
15	Chapter 11	Exponents and scientific notation.
16	Chapter 12	Exponential functions; Bonus 4, type 7.
17	Chapter 13	Sequences (skip if not in your course and review Chapter 12 instead).
18	Chapter 14	Polynomial operations.
19	Chapter 15	Factoring and solving by factoring.
20	Review	Missed questions from Days 15–19.
21	Practice Test 3	Timed (90 minutes); mark it and use the review map.
22	Chapter 16	Quadratic functions and graphs; Bonus 4, types 8 and 9.
23	Chapter 17	Solving quadratic equations.
24	Chapter 18	Statistics and data.
25	Chapter 19	Comprehensive review and mixed practice.
26	Weak topics	The three weakest topics from your review-map tally (Bonus 3).
27	Practice Test 4	Full examination conditions (120 minutes).
28	Final review	Missed questions from Practice Test 4; Bonus 1; Appendix F checklist.

Two-Week Plan

Day	Focus	Tasks
1	Starting point	Diagnostic test; list your weak chapters from the scoring guide.
2	Foundations	Chapter reviews 1–5; assessments for any weak chapter.
3	Linear functions	Chapter reviews 6–8; graphing practice in Chapter 7.
4	Systems	Chapters 9–10: guided practice and assessments.
5	Practice Test 1	Timed; mark it and fill in the review-map tally.
6	Exponents	Chapters 11–13: reviews and assessments.
7	Polynomials	Chapters 14–15: assessments; redo every missed factoring question.
8	Quadratics	Chapters 16–17: worked examples and assessments.
9	Statistics	Chapter 18 assessment; Bonus 4 (all types).
10	Practice Test 2	Timed; mark it and update the tally.
11	Mixed review	Chapter 19 mixed practice and real-world challenges.

Day	Focus	Tasks
12	Practice Test 3	Timed; mark it and study every missed solution.
13	Practice Test 4	Full examination conditions.
14	Final review	Bonus 1, Appendix C, and Appendix F checklist; rest well.
